

# 1815 Wire mesh clamp/panel

**Use:** to lock TEC wire mesh (3mm  $\varnothing$  wire) buffers or 6 mm thick panels. Highly recommended because it is so easy to fit not requiring precise drilling on the framework.

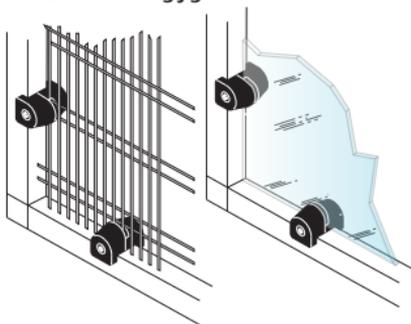

With special burglarproof treatment.

**Material** reinforced polyamide half-clamps, AISI 304 stainless steel nuts and bolts.

**State of supply** complete with 2 half-clamps, 1 3x32 cylindrical pin, 1 M6x30 socket head screw and 1 M6 nut.

Tubular drilling jig Part 1873
